

10000mAh Power Bank with LCD Display, Retractable USB-C Cable and 45W USB-C Port

SKU: UQBB10000RETLCDPD40

Everything you need for fast, safe charging on the go

This **10000mAh power bank** is a practical, all-in-one solution for charging your devices away from home. Thanks to the **built-in retractable USB-C cable**, you can start charging straight away without carrying additional accessories. With a maximum output of **45W**, the power bank is suitable for a wide range of devices, including compatible laptops. The integrated **LCD display** lets you keep track of the remaining battery level at a glance.

CHARGING AND CONVENIENCE

How much power does this power bank deliver?

The **Power Flux 10000mAh power bank** can deliver up to **45W Power Delivery** when either the USB-C port or the integrated retractable USB-C cable is used individually. This provides powerful and safe charging for a wide range of devices, including compatible laptops with higher power requirements.

How does the retractable USB-C cable work?

The **built-in retractable USB-C cable** extends up to 60 cm and stores directly inside the power bank body. Its magnetic housing keeps the cable neatly in place when not in use, so there is no need to carry a separate cable.

Can I also use the USB-C port to charge my devices?

Yes. Both the **USB-C port** and the **built-in USB-C cable** can be used to charge your devices. When using one connection at a time, each can deliver up to 45W with compatible devices.

How do I recharge the power bank?

Both the USB-C port and the integrated USB-C cable can be used to recharge the internal battery. As inputs, they support **Power Delivery up to 30W**, making it quicker and more convenient to recharge the power bank with a compatible USB-C charger.

INTEGRATED TECHNOLOGIES

What is Power Delivery?

Power Delivery technology allows the power bank and connected device to communicate and select the most suitable power level. This means you can safely charge different devices, from higher-power products such as laptops to lower-power devices such as wireless earbuds and e-readers. It also enables faster, more controlled charging than conventional charging solutions without fast-charging protocols.

What is PPS used for?

PPS, or Programmable Power Supply, continuously adjusts voltage and current during charging. This allows the charging profile of compatible devices to be managed more precisely than with Power Delivery alone, adapting the output to the specific requirements of the connected device.

What does the LCD display show?

The **integrated LCD display** shows the remaining battery percentage. You can instantly check how much power is left before heading out, while travelling or while charging your devices.

How do I control the display?

The side button controls the screen. Press it to activate the always-on display mode or to switch the display on and off.

SAFETY AND EVERYDAY USE**Can I charge two devices at the same time?**

Yes. You can use the USB-C port and retractable USB-C cable at the same time. When **two devices are connected simultaneously**, the power bank automatically distributes the available power up to a maximum shared output of 15W.

Which devices can I charge with this power bank?

The power bank is suitable for compatible **iPhones, smartphones, tablets, laptops and wireless earbuds** that support USB-C charging. Actual charging speed depends on the charging specifications supported by the connected device.

What protection systems are built in?

The safety system provides protection against **overvoltage, overheating and short circuits**. These functions monitor the power bank while charging connected devices and while recharging its internal battery.

WHAT'S IN THE BOX

- 1 45W power bank

10000mAh Power Bank with LCD Display, Retractable USB-C Cable and 45W USB-C Port
SKU: UQBB10000RETLCDPD40

Technical data

SKU: UQBB10000RETLCDPD40

Weight: 0.0200 g

Battery capacity: 10000 mAh

Recharging cable: USB - Type C

Maximum output power: 45 W

EAN: 8018417547706

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to Battery Regulation 2023/1542/EU, Item subject to CE marking, Packaging of the item subject to the "Green Dot" recycling system, The item packaging is recyclable, Item subject to UKCA marking

Color: black

Output: 5V D.C. 3A/9V D.C.3A/12V D.C. 3A/15V D.C. 3A/20V D.C. 2,25A (45W)

Battery: Lithium polymer battery

Connector: 1xUSB-C,

Technology: Power Delivery (PD), Programmable Power Supply

Charging type: Power Delivery
