

100W GaN charger kit with two USB-C ports and 1.5m braided cable

SKU: UQTRKITGAN2C100W

A compact, powerful and complete kit for charging compatible laptops, tablets and smartphones

The Mini Cube 100 kit includes a 100W GaN charger with two USB-C ports and a 1.5-metre Premium braided USB-C to USB-C cable. The main port delivers up to 100W for charging compatible laptops, tablets and smartphones, while the second 20W port lets you power an additional device. With Power Delivery 3.0, AVS support and compact dimensions of 80 × 36 × 36 mm, it is a complete solution for home, office and travel.

Charging and power

Can I also charge a high-power laptop?

Yes. The USB-C1 port delivers up to 100W when used on its own, making it suitable for many notebooks and laptops compatible with USB-C charging, as well as tablets, smartphones and power banks. Actual charging speed depends on the power supported by the device and the cable used.

What is the second USB-C port for?

The USB-C2 port supports Power Delivery up to 20W and is designed for smartphones, tablets, earbuds, power banks and other compatible accessories. It lets you connect a second device without needing another power adapter.

Can I charge two devices at the same time?

Yes. When both ports are used, the charger delivers up to 65W through USB-C1 and up to 20W through USB-C2, for a maximum combined output of 85W. Actual power distribution depends on the connected devices and the charging profiles they support.

Is charging faster than with a standard charger?

Yes, on compatible devices. Power output of up to 100W allows significantly faster charging than common 5W USB power adapters, especially for laptops, tablets and smartphones that support Power Delivery.

Does the power automatically adapt to the device?

Yes. Power Delivery 3.0 negotiates voltage and current with the connected compatible device, supplying the required amount of power without delivering more than necessary. AVS support also enables variable voltage adjustment from 9 to 20V, with currents up to 5A on compatible devices.

Technology, safety and cable

Why choose a charger with GaN technology?

Gallium nitride semiconductors can handle high power with lower energy losses than traditional silicon semiconductors. This allows the charger to remain compact without compromising the performance required by laptops and high-power devices.

Is the cable already included in the package?

Yes. The kit includes a 1.5-metre Premium braided USB-C to USB-C cable with USB-C 2.0 connectors and support for up to 5A. This makes it suitable for taking advantage of the charger's high power with compatible devices.

Is the cable durable enough for everyday use?

Yes. The braided outer layer offers greater resistance to wear and bending than standard cables with a smooth jacket, making it practical for home, office and travel.

Is charging controlled according to the device?

Yes. Power Delivery and AVS regulate power delivery according to the profile supported by the compatible device, providing more controlled power management than a fixed-output power adapter. When both ports are in use, the available power is distributed automatically.

Compatibility and portability

Which devices can I charge?

The kit is compatible with USB-C laptops and notebooks, iPhones, Android smartphones, tablets, power banks, earbuds and other devices that support USB-C charging and Power Delivery.

Is it easy to carry with me?

Yes. The charger measures 80 × 36 × 36 mm including the plug and delivers up to 100W in a more compact format than many traditional notebook power adapters. It fits easily into a bag, backpack or suitcase.

Can I use it while travelling?

Yes. The integrated European plug is ready to use in Italy and in countries that use the same standard. The two ports and included 1.5-metre cable let you replace several separate accessories with one compact kit.

Is it ready to use?

Yes. Both the charger and cable are included in the package, so there is no need to purchase additional accessories before charging compatible devices.

WHAT'S IN THE BOX

- 1 Mini Cube 100 wall charger
- 1 1.5 m braided USB-C to USB-C cable

100W GaN charger kit with two USB-C ports and 1.5m braided cable
SKU: UQTRKITGAN2C100W

Technical data

SKU: UQTRKITGAN2C100W

Weight: 0.4000 g

Output power: 100W

Maximum output power: 100 W

EAN: 8018417544897

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, The device is protected by double insulation, an earthed connection is not permitted, Packaging of the item subject to the "Green Dot" recycling system, Use the product indoors and in a sheltered environment, The item packaging is recyclable, Item subject to UKCA marking

Color: white

Input: 100-240 V A.C. 50/60 Hz - 1.5 A

Output: 5V D.C. 3A / 9V D.C. 3A / 12V D.C. 3A / 15V D.C. 3A / 20V

D.C. 5A (PD 100W), 5V D.C. 3A/9V D.C. 2.22A (PD 20W)

Connector: 2xUSB-C

Plug type: EU

Technology: Adjustable Voltage Supply, GaN, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery

Input voltage: 100 - 240 Vac / 50-60 Hz

Included accessories: 1 USB-C power cable
