

65W GaN charger kit with two USB-C ports and 1.5m braided cable

SKU: UQTRKITGAN2C65W

A complete solution for charging compatible laptops, tablets, smartphones and accessories, with Power Delivery technology and a compact design

The Mini Cube 65 kit includes a 65W GaN charger with two USB-C ports and a 1.5-metre braided USB-C to USB-C cable. It is a complete solution for charging compatible laptops, tablets, smartphones and accessories, featuring Power Delivery 3.0 and a compact 80 × 36 × 36 mm design.

Charging and power

Can I also charge a laptop?

Yes. Each USB-C port can deliver up to 65W when used individually, making it suitable for notebooks and laptops compatible with USB-C charging, as well as smartphones, tablets and power banks. Actual charging speed depends on the power supported by the device and the cable used.

Can I connect two devices at the same time?

Yes. The two USB-C ports allow you to connect two devices simultaneously. According to the specifications shown on the packaging, when both ports are in use the combined output is 5V/3A, equal to 15W shared in total between the connected devices.

Is charging faster than with a standard charger?

Yes, on compatible devices. When using a single port, power output of up to 65W allows significantly faster charging than common 5W USB power adapters. Maximum charging speed is achieved when the device supports Power Delivery and the charger is used with a single output.

Does the power automatically adapt to the device?

Yes. Power Delivery 3.0 negotiates voltage and current with the connected compatible device, supplying the required power without delivering more than necessary. AVS support also enables variable voltage adjustment between 9 and 20V on compatible devices.

Technology, safety and cable

Why choose a charger with GaN technology?

Gallium nitride semiconductors can handle high power with lower energy losses than traditional silicon semiconductors. This allows the charger to remain compact without compromising performance.

Is the cable already included in the package?

Yes. The kit includes a 1.5-metre Premium braided USB-C to USB-C cable with USB-C 2.0 connectors and support for up to 3A, ready to connect the charger to compatible devices.

Is the cable durable enough for everyday use?

Yes. The braided outer layer offers greater resistance to wear and bending than standard cables with a smooth jacket, making it practical for home, office and travel.

Is charging controlled according to the device?

Yes. Power Delivery adjusts the power according to the profile supported by the compatible device, providing more controlled power management than a fixed-output power adapter. When both ports are used, the available power is shared automatically.

Compatibility and portability

Which devices can I charge?

The kit is compatible with USB-C laptops and notebooks, iPhones, Android smartphones, tablets, power banks, earbuds and other devices that support USB-C charging and Power Delivery.

Is it easy to carry with me?

Yes. The charger measures 80 × 36 × 36 mm including the plug and takes up less space than many traditional notebook power adapters. Its compact design makes it easy to store in a bag, backpack or suitcase.

Can I use it while travelling?

Yes. The integrated European plug is ready to use in Italy and in countries that use the same standard. The charger and 1.5-metre cable allow you to replace several separate accessories with one compact kit.

Is it ready to use?

Yes. Both the charger and cable are included in the package, so there is no need to purchase additional accessories before charging compatible devices.

WHAT'S IN THE BOX

- 1 Mini Cube 65 wall charger
- 1 1.5 m braided USB-C to USB-C cable

65W GaN charger kit with two USB-C ports and 1.5m braided cable
SKU: UQTRKITGAN2C65W

Technical data

SKU: UQTRKITGAN2C65W

Weight: 0.3000 g

Output power: 65W

Maximum output power: 65 W

EAN: 8018417544880

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, The device is protected by double insulation, an earthed connection is not permitted, Packaging of the item subject to the "Green Dot" recycling system, Use the product indoors and in a sheltered environment, The item packaging is recyclable, Item subject to UKCA marking

Color: white

Input: 100-240 V A.C. 50/60 Hz - 1.5 A

Output: 5V D.C. 3A / 9V D.C. 3A /12V D.C. 3A/15V D.C. 3A /20V D.C.

3,25A (PD 65W)

Connector: 2xUSB-C

Plug type: EU

Technology: Adjustable Voltage Supply, GaN, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery

Input voltage: 100 - 250 VAC / 50-60 Hz

Included accessories: 1 USB-C power cable
