

100W Charger Kit with Three USB-C Ports, One USB-A Port, Integrated TFT Display and 1.5 m USB-C Cable

SKU: UQTRKITTFT100W

Power up to four devices from a single outlet, ideal for laptops, smartphones, tablets and other accessories.

The 100W Control Cube 100 GaN charger powers laptops, smartphones, tablets and accessories from a single wall outlet. It features three USB-C ports, one USB-A port, an active TFT display and a 1.5-metre braided USB-C to USB-C cable, making it a powerful and complete solution for home, office and travel.

Charging and power

Can I also charge a laptop?

Yes. The USB-C1 and USB-C2 ports support Power Delivery 3.0 and can each deliver up to 100W when used individually. The charger is therefore suitable for many notebooks and laptops compatible with USB-C power delivery, as well as smartphones and tablets.

How many devices can I power at the same time?

You can connect up to four devices using the three USB-C ports and the USB-A port. Compared with a charger with a single output, it allows you to power a laptop, smartphone, tablet and accessories from one wall outlet, reducing the number of power adapters on your desk or in your luggage.

How is power distributed between the ports?

When USB-C1 and USB-C2 are used at the same time, the charger can distribute up to 65W + 35W. When USB-C1 or USB-C2 is used together with USB-C3, the distribution can reach up to 65W + 20W. Pairing either of the two main ports with USB-A can provide up to 65W + 18W.

With three devices connected, power can be distributed up to 45W + 35W + 20W through the three USB-C ports, or up to 45W + 35W + 18W when using two USB-C ports and the USB-A port. When all four outputs are active, USB-C1 and USB-C2 can deliver up to 45W and 35W respectively, while USB-C3 and USB-A share up to 15W.

Is charging faster than with a standard charger?

Yes. Power Delivery 3.0 and power output up to 100W allow significantly faster charging than common 5W or 10W USB power adapters on compatible devices. Actual charging speed depends on the power supported by the device and the cable used.

Control, efficiency and safety

What is the TFT display for?

The active TFT display shows charging status and power output. Compared with a charger without a screen, it allows you to quickly monitor how the ports are operating and how much power is being supplied to the connected devices.

How do I use the touch button?

The integrated touch button lets you interact with the display and check charging information easily without disconnecting your devices.

Why choose a charger with GaN technology?

Gallium nitride semiconductors can handle high power in a more compact body and with lower energy losses than traditional chargers based exclusively on silicon semiconductors.

Does the power adapt to the connected devices?

Yes. Power Delivery 3.0 adjusts the power supplied by the USB-C ports according to the requirements of compatible devices. The USB-A port supports Adaptive Fast Charge up to 18W. When multiple outputs are used, the charger automatically distributes the available power between the connected devices.

Everyday use and portability

Is the cable included in the package?

Yes. The package includes a 1.5-metre Premium braided USB-C to USB-C cable compatible with currents up to 5A. The braided outer layer offers greater resistance to everyday wear than standard cables with a smooth jacket.

Can I also use devices with a USB-A cable?

Yes. The USB-A port allows you to continue using cables and accessories with a traditional connector, while the three USB-C ports are designed for newer-generation devices.

Is it suitable for home, office and travel?

Yes. The four outputs and total power of up to 100W allow you to replace multiple power adapters with a single charger, reducing clutter on your desk, in your backpack or in your suitcase.

Which devices can I charge?

You can power laptops, iPhones, Android smartphones, tablets, power banks, wireless earbuds and other devices compatible with USB-C or USB-A charging.

WHAT'S IN THE BOX

- 1 Control Cube 100 wall charger
- 1 1.5-metre braided USB-C to USB-C cable

100W Charger Kit with Three USB-C Ports, One USB-A Port, Integrated TFT Display and 1.5 m USB-C Cable
SKU: UQTRKITTFT100W

Technical data

SKU: UQTRKITTFT100W

Weight: 0.7000 g

Output power: 100W

Maximum output power: 100 W

EAN: 8018417544927

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, The device is protected by double insulation, an earthed connection is not permitted, Packaging of the item subject to the "Green Dot" recycling system, Use the product indoors and in a sheltered environment, The item packaging is recyclable, Item subject to UKCA marking

Color: black

Input: 100-240 V A.C. 50/60 Hz - 1.5 A

Output: 5V D.C. 3A / 9V D.C. 3A / 12V D.C. 3A / 15V D.C. 3A / 20V D.C. 5A (PD 100W), 5V D.C. 3A / 9V D.C. 2A / 12V D.C. 1,5A (18W), 5V D.C. 3A/9V D.C. 2,22A/ 12V D.C. 1,67A (PD 20 W)

Connector: 3xUSB-C, 1xUSB-A

Plug type: EU

Technology: Adaptive Fast Charge, GaN, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery

Input voltage: 100 - 250 VAC / 50-60 Hz

Included accessories: 1 USB-C power cable
