

140W Charger Kit with Two USB-C Ports, One USB-A Port, Integrated TFT Display and 1.5 m USB-C Cable

SKU: UQTRKITTFT140W

A powerful all-in-one solution for charging high-performance laptops, smartphones, tablets and accessories from a single outlet.

The 140W Control Cube 140 GaN charger charges high-performance laptops, smartphones, tablets and accessories from a single wall outlet. It features two USB-C ports, one USB-A port, an active TFT display and a 1.5-metre braided USB-C cable, making it a powerful and complete solution for home, office and travel.

Charging and power

Can I also charge high-power laptops?

Yes. Both USB-C ports support Power Delivery 3.0 and can each deliver up to 140W when used individually, making them suitable for many professional notebooks and laptops compatible with high-power USB-C charging.

Can I power multiple devices at the same time?

Yes. The two USB-C ports and the USB-A port allow you to connect up to three devices simultaneously. Power is distributed automatically according to the ports in use and the requirements of the connected devices.

Is charging faster than with a standard charger?

Yes, on compatible devices. Compared with a 5W USB charger, power output of up to 140W allows significantly shorter charging times for laptops, tablets and smartphones that support Power Delivery.

How much power is available when I use multiple ports?

With two devices connected to the USB-C ports, power can be distributed up to 100W + 35W. When using one USB-C port together with the USB-A port, distribution can reach up to 100W + 18W. With all three ports in use, the charger can deliver up to 65W + 45W + 18W, within a maximum total output of 140W.

Control and safety

What is the TFT display for?

The TFT display clearly shows operating status and the power delivered by each port. Compared with chargers without a display, it allows you to immediately check how power is being distributed between the connected devices.

How do I use the touch button?

The touch button lets you interact with the display quickly and easily, making it more convenient to check charging information.

Why choose a charger with GaN technology?

Gallium nitride semiconductors are more efficient and heat-resistant than traditional silicon semiconductors. This makes it possible to deliver up to 140W in a more compact body, with lower energy losses than a traditional power adapter with similar output.

Is charging safe for my devices?

Yes. Power Delivery adjusts the power output according to the connected compatible device, providing more controlled charging than power adapters with fixed output. Automatic power distribution between the ports also helps prevent devices from receiving more power than they require.

Everyday use**Is the cable included in the package?**

Yes. A 1.5-metre Premium braided USB-C to USB-C cable supporting currents up to 5A is included, making it suitable for taking advantage of the charger's high output with compatible devices.

Is it suitable for travel and commuting?

Yes. The ability to power up to three devices allows you to replace multiple chargers with a single accessory, reducing the space required in a bag or backpack compared with using separate power adapters.

Which devices can I charge?

You can power iPhones, Android smartphones, tablets, earbuds, power banks and laptops compatible with USB-C charging. The USB-A port also allows you to continue using cables and accessories with a traditional connector.

WHAT'S IN THE BOX

- 1 Control Cube 140 wall charger
- 1 1.5 m braided USB-C to USB-C cable

140W Charger Kit with Two USB-C Ports, One USB-A Port, Integrated TFT Display and 1.5 m USB-C Cable
SKU: UQTRKITTFT140W

Technical data

SKU: UQTRKITTFT140W

Net Depth: 10.5000 cm

Net Width: 3.4000 cm

Net Height: 6.7000 cm

Weight: 30 g

Output power: 140W

Maximum output power: 140 W

EAN: 8018417544934

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, The device is protected by double insulation, an earthed connection is not permitted, Packaging of the item subject to the "Green Dot" recycling system, Use the product indoors and in a sheltered environment, The item packaging is recyclable, Item subject to UKCA marking

Color: black

Input: 100-240V A.C. 50/60 Hz 2A

Output: 5,0 V D.C. 3,0 A / 9,0 V D.C. 3,0 A / 12,0 V D.C 3,0 A / 15,0 V

D.C 3,0 A / 20,0 V D.C 5,0 A / 28,0 V D.C 5,0 A (PD 140,0 W), 5V

D.C. 3A / 9V D.C. 2A / 12V D.C. 1,5A (18W)

: 85044060

Connector: 2xUSB-C, 1xUSB-A

Plug type: EU

Technology: Adaptive Fast Charge, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery

Input voltage: 100 - 240 Vac / 50-60 Hz

Included accessories: 1 USB-C power cable
