

70W GaN charger kit with TFT display, 2 USB-C, USB-A and included cable

SKU: UQTRKITTFT70W

A compact all-in-one charging solution for home, office and travel

The 70W GaN Control Cube 70 charger powers laptops, smartphones, tablets and accessories from a single wall outlet. It features two USB-C ports, one USB-A port, an active TFT display and a 1.5 metre braided USB-C cable: a compact all-in-one solution for home, office and travel.

Charging and power

Can I charge a laptop?

Yes. The USB-C ports support Power Delivery 3.0 and can deliver up to 70W when used individually, making them suitable for many notebooks and laptops that support USB-C charging.

Can I power multiple devices at the same time?

Yes. The two USB-C ports and USB-A port let you connect up to three devices at the same time. Power is distributed automatically according to the ports in use and the requirements of the connected devices.

Is charging faster than with a standard charger?

Yes, with compatible devices. Compared with a 5W USB charger, power output of up to 70W can significantly reduce charging times for smartphones, tablets and laptops that support Power Delivery.

How much power is available when using multiple ports?

With two devices connected to the USB-C ports, power can be distributed at up to 45W + 20W. When using USB-C1 and USB-A, output can reach up to 45W + 18W. With all three ports in use, the charger automatically manages power within a maximum total output of 70W.

Control and safety

What is the TFT display for?

The TFT display clearly shows the operating status and the power delivered by each port. Compared with chargers without a display, it lets you immediately see how power is being distributed between connected devices.

How does the touch button work?

The touch button makes it easy to interact with the display and check charging information. Press the button to turn on the display and switch between the data shown. Press and hold it for 2 seconds to rotate the display orientation.

Why choose a charger with GaN technology?

Gallium nitride semiconductors are more efficient and more resistant to heat than traditional silicon semiconductors. This makes it possible to deliver high power from a more compact charger while reducing energy losses.

Is charging safe for my devices?

Yes. Power Delivery adjusts the power supplied according to the compatible device connected, providing more controlled charging than power adapters with a fixed output. Automatic power distribution also helps reduce the risk of overload.

Everyday use

Is the cable included in the box?

Yes. A 1.5 metre Premium braided USB-C to USB-C cable is included. It is designed for everyday use and is suitable for charging compatible smartphones, tablets and laptops.

Is it suitable for travel and commuting?

Yes. Its compact design lets you replace multiple power adapters with a single charger, reducing the amount of space required in your bag or backpack compared with carrying a separate charger for each device.

Which devices can I charge?

You can charge iPhone, Android smartphones, tablets, earbuds, power banks and laptops that support USB-C charging. The USB-A port also lets you continue using cables and accessories with a traditional USB-A connector.

What's in the box

- 1 Control Cube 70 wall charger
- 1 1.5 m braided USB-C to USB-C cable

70W GaN charger kit with TFT display, 2 USB-C, USB-A and included cable
SKU: UQTRKITTFT70W

Technical data

SKU: UQTRKITTFT70W

Weight: 0.9000 g

Output power: 70W

Maximum output power: 70 W

EAN: 8018417544941

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, The device is protected by double insulation, an earthed connection is not permitted, Packaging of the item subject to the "Green Dot" recycling system, Use the product indoors and in a sheltered environment, The item packaging is recyclable, Item subject to UKCA marking

Color: black

Input: 100-240 V A.C. 50/60 Hz - 1.5 A

Output: USB-C1 70W max/ USB-C2 70W max/USB-A 30W max

Connector: 2xUSB-C, 1xUSB-A

Plug type: EU

Technology: Adaptive Fast Charge, GaN, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery 70W

Input voltage: 100V - 240V A.C. 50/60 Hz 1.5 A

Included accessories: 1 USB-C power cable
