

165W GaN Wall Charger Kit with TFT Display, 3 USB-C Ports, USB-A and USB-C Cable

SKU: UQTRRETKITFT165FOLD

165W GaN charger and cable kit with TFT display and four USB ports for charging laptops, smartphones, tablets and accessories simultaneously.

The Control Cube 165 165W GaN wall charger powers laptops, smartphones, tablets and accessories from a single socket. Its three USB-C ports, USB-A port, TFT display and included 1.5-metre braided USB-C cable provide a complete solution for high-power multi-device charging at home, in the office and while travelling.

Charging and power

Can I also charge a high-performance laptop?

Yes. The main USB-C port delivers up to 140W when used individually, while the charger's total power output reaches up to 165W. It is therefore suitable for laptops, MacBooks and other compatible USB-C devices that require more power than smartphones and tablets.

How many devices can I charge at the same time?

You can connect up to four devices using the three USB-C ports and the USB-A port. Compared with a charger with a single output, it allows you to power laptops, smartphones, tablets and accessories from one socket, reducing the number of chargers on your desk or in your luggage.

How is the power distributed between the ports?

When using a single output, the USB-C ports can deliver up to 140W, 100W and 20W respectively, while the USB-A port delivers up to 18W. When multiple devices are connected, the charger automatically distributes the available power. For example, with two active USB-C ports, it can provide up to 100W + 65W or 140W + 20W, depending on the ports used and the connected devices.

Is charging faster than with a standard charger?

Yes. Power Delivery 3.0 technology and an output of up to 140W from a single USB-C port provide much faster charging for compatible devices than standard 5W or 10W USB chargers. The actual charging speed depends on the power supported by the device and the cable used.

Control, efficiency and safety

What is the TFT display used for?

The TFT display shows the total power output and information about the active outputs in real time. Compared with a charger without a screen, it makes it easier to monitor how power is distributed between the connected devices.

Can I control the information shown on the display?

Yes. The integrated touch button allows you to interact with the display and view the charging information easily without disconnecting the devices.

Why choose a charger with GaN technology?

Gallium nitride semiconductors make it possible to handle high power levels in a more compact body, with lower energy loss than traditional chargers based exclusively on silicon semiconductors. This makes the charger easier to carry without compromising performance.

Does the power output adapt to the connected devices?

Yes. Power Delivery 3.0 technology negotiates the required power with compatible devices and distributes it between the active ports. Compared with a fixed-output charger, it provides power management that is better suited to the different requirements of laptops, smartphones and accessories.

Everyday use and portability

Is the plug foldable?

Yes. The European plug can be folded into the charger body, reducing its overall size and protecting the contacts during transport. It is a more practical solution than a charger with a fixed plug, especially when carried in a bag or suitcase.

Is the cable included?

Yes. The package includes a 1.5-metre Premium braided USB-C to USB-C cable. The braided covering provides greater resistance to everyday use than a standard cable with a smooth outer jacket.

Is it suitable for use at home, in the office and while travelling?

Yes. Its high power output, four ports and foldable plug make it suitable for a complete workstation, as well as for business trips and travel when you want to replace multiple chargers with a single accessory.

Key features

- Total power output of up to 165W
- Three USB-C ports and one USB-A port
- Main USB-C port with up to 140W output
- Second USB-C port with up to 100W output
- Third USB-C port with up to 20W output
- USB-A port with up to 18W output
- Simultaneous charging of up to four devices
- Power Delivery 3.0 technology
- GaN technology for high performance in a compact size
- TFT display for monitoring power output in real time
- Touch button for display control
- Foldable European plug
- Compatible with laptops, smartphones, tablets and USB accessories
- 1.5-metre Premium braided USB-C to USB-C cable included

What is included in the package

- 1 Control Cube 165 wall charger
- 1 1.5-metre braided USB-C to USB-C cable

165W GaN Wall Charger Kit with TFT Display, 3 USB-C Ports, USB-A and USB-C Cable
SKU: UQTRRETKITTFT165FOLD

Technical data

SKU: UQTRRETKITTFT165FOLD

Weight: 0.0200 g

Output power: 165W

Maximum output power: 165 W

EAN: 8018417547645

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, Packaging of the item subject to the "Green Dot" recycling system, The item packaging is recyclable, Item subject to UKCA marking

Input: 100 - 240 VAC / 50-60 Hz

Output: USB-C1 140W max/USB-C2 100W max/USB-C3 20W max/

USB-A 18W max

Connector: 3xUSB-C, 1xUSB-A

Plug type: EU

Technology: Adaptive Fast Charge, GaN, Power Delivery (PD),

Programmable Power Supply

Charging type: Power Delivery 165W

Input voltage: 100 - 240 Vac / 50-60 Hz
