

65W GaN wall charger with foldable plug and retractable USB-C cable

SKU: UQTRRETPD65FOLD

Charge everything you need with one charger.

The Fold Cube 65 65W GaN wall charger features a USB-C port and a retractable USB-C cable, allowing you to charge laptops, smartphones and tablets with a single accessory. Power Delivery 3.0 technology, the foldable European plug and the compact design make it a practical solution for use at home, in the office and while travelling.

Charging and power

Can I charge a laptop?

Yes. Both the USB-C port and the integrated USB-C cable support a maximum power output of up to 65W when used individually. The charger is therefore suitable for notebooks compatible with USB-C charging, as well as smartphones and tablets.

Can I charge two devices at the same time?

Yes. When the USB-C port and the retractable cable are used simultaneously, the charger distributes up to 45W through one output and up to 20W through the other. This allows you, for example, to charge a laptop and a smartphone at the same time using a single charger.

Is charging faster than with a standard charger?

Yes. Thanks to its power output of up to 65W and Power Delivery 3.0 technology, it provides faster charging for compatible devices compared with standard 5W or 10W USB chargers.

Efficiency and safety

Why choose a charger with GaN technology?

Gallium nitride semiconductors deliver high performance in a more compact design, with lower energy loss compared with chargers based on traditional silicon semiconductors.

Does the power output adapt to the connected device?

Yes. Power Delivery 3.0 technology adjusts the power supplied according to the requirements of the compatible device. Compared with a fixed-output charger, it enables more efficient charging management and helps reduce overloads and energy waste.

Can I use both the port and the cable without damaging my devices?

Yes. When both outputs are active, the available power is automatically distributed between the connected devices. Each compatible device therefore receives the power required by its charging profile.

Everyday use and portability

Is the cable already integrated into the charger?

Yes. The retractable USB-C cable is built into the charger body: simply pull it out when needed and retract it after use. Compared with a charger with a separate cable, it reduces the risk of leaving the cable behind and helps keep your bag tidy.

Is the plug foldable?

Yes. The European plug can be folded into the charger body, reducing its overall size and protecting the contacts during transport.

Is it suitable for travelling?

Yes. The compact design, retractable cable and foldable plug make the Fold Cube 65 easier to carry than a traditional charger with a separate cable. It is ideal for keeping in a backpack, bag or suitcase.

Which devices can I charge?

It is compatible with laptops, smartphones, tablets and other devices equipped with a USB-C port that support the charging profiles provided by the charger.

Key features

- GaN wall charger with a maximum power output of up to 65W
- USB-C port with power output of up to 65W
- Integrated retractable USB-C cable with power output of up to 65W
- Simultaneous charging via port and cable: up to 45W + 20W
- Power Delivery 3.0 technology for adaptive charging
- GaN technology: greater efficiency and a more compact design compared with traditional silicon chargers
- Foldable European plug
- Compatible with USB-C laptops, smartphones and tablets
- A compact and practical solution for home, office and travel

What is included in the package

- 1 Fold Cube 65 wall charger with integrated retractable USB-C cable

65W GaN wall charger with foldable plug and retractable USB-C cable
SKU: UQTRRETPD65FOLD

Technical data

SKU: UQTRRETPD65FOLD

Weight: 0.0200 g

Output power: 65W

Maximum output power: 65 W

EAN: 8018417547638

GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, Packaging of the item subject to the "Green Dot" recycling system, The item packaging is recyclable, Item subject to UKCA marking

Input: 100-240 V A.C. 50/60 Hz - 1.5 A

Output: 5V D.C. 3A / 9V D.C. 3A / 12V D.C. 3A / 15V D.C. 3A / 20V D.C. 3,25A (PD 65W)

Connector: 1 USB-C PD

Plug type: EU

Technology: GaN, Power Delivery (PD), Programmable Power Supply

Charging type: Power Delivery 65W

Input voltage: 100V - 240V A.C. 50/60 Hz 1.5 A
